

GANESH MARMAT

Senior C#.NET Software Engineer & Technical Lead

Pune, India | +91-9405678664 | ganeshmarmat@gmail.com | [linkedin.com/in/ganesh-marmat-388a7a49](https://www.linkedin.com/in/ganesh-marmat-388a7a49)

PROFILE SUMMARY

Accomplished Senior Software Engineer and Technical Lead with **11+ years of experience** architecting, building, and scaling high-performance enterprise applications, distributed systems, and microservices. Expert in Microsoft technologies including **C#, .NET Core 10 (.NET 5/6/7/8/9/10), .NET Framework 4.8 (4.5–4.8), ASP.NET Core, REST APIs, Web API, WPF, T-SQL, PostgreSQL, and Elasticsearch (7.x / 8.x)**, alongside 3+ years of specialization in **Agentic AI Engineering (LangGraph, Python, LLM Integration, ML.NET)**. Proven track record leading solution strategy, preparing architecture design documents, conducting defect resolution, and driving Agile delivery for global enterprises including Cloud Software Group (Veritas / Arctera) and Persistent Systems (Agilent Technologies).

TECHNICAL SKILLS

Languages & Core: C#, Python, .NET Core 10 (.NET 5 / 6 / 7 / 8 / 9 / 10), .NET Framework 4.8 (4.5–4.8), Object-Oriented Programming (OOP), SOLID Principles, Multithreading, TPL, Async/Await, LINQ, TypeScript, JavaScript, Node.js

Web, API & Architecture: ASP.NET Core, REST API, Web API, OData, IIS 8.5+, Microservices Architecture, Distributed Systems, Event-Driven Architecture, WPF, MVVM, Prism, Angular, HTML5, Sci-Chart, ParamQuery, jQuery

Databases & Search: SQL Server, T-SQL (Server 14, SQL Jobs), PostgreSQL, Elasticsearch (7.x / 8.x), SQLite, MongoDB, MySQL, Query Optimization

AI & Automation: Agentic AI, LangGraph, LLM Integration, Prompt Engineering, Tool Calling, OpenAPI / Swagger, FastAPI, ML.NET (Binary & Multiclass)

Tools & DevOps: WIX Toolset 3.11, Azure, AWS, Docker, CI/CD, Azure DevOps, TeamCity, Git, Visual Studio (15, 17), JIRA, Bitbucket, TFS, ClearCase, NUnit, Selenium

WORK EXPERIENCE & PROJECTS

Cloud Software Group (CSG) — via Arctera (formerly Veritas Technologies LLC)

Senior Software Engineer

March 2020 – Present | Pune, India

Enterprise Data Supervision & Cloud Platform

Agentic QA Framework & AI Assistant

AI Engineer

Tech Stack: LangGraph, Python, LLM Integration, FastAPI, OpenAPI, Swagger

Description: AI-powered API test automation framework and conversational AI assistant for task automation.

- Built an automated API testing framework (LangGraph, FastAPI) ingesting OpenAPI JSON to execute plain-English API test validation without manual scripting.
- Architected a modular conversational AI assistant for multi-step task execution, API orchestration, and enterprise service integration.

Intelligent Email Review System (ML.NET)

ML Engineer

Tech Stack: ML.NET, Python, Binary & Multiclass Classification, Data Pipelines

Description: Machine learning email classification system automating triage workflows.

- Developed email triage models in C# using **ML.NET** (binary relevance and multiclass categorization models) to streamline review operations.
- Built end-to-end ML data pipelines and visual data displays to surface classification results for business decision-making.

Arctera Insight Supervision - AIS (Cloud Web Application)

Full Stack Developer

Tech Stack: C#, .NET Core 7 / 8 / 10, Angular, T-SQL, PostgreSQL, Elasticsearch (8.x) | **Env:** Visual Studio 17, Git, Bitbucket, JIRA, TFS

Description: Cloud supervision platform monitoring, searching, retrieving, and reporting across all enterprise content sources (Email, Bloomberg, Teams Chat, Slack, and electronic communications) for regulatory compliance.

- Engineered full-stack web features using **Angular** on the front-end and **.NET Core 7/8/10** on the back-end, contributing multiple core user interface workflows, data dashboards, and search experience features.
- Participated in technical decision-making to increase application agility, authored technical design documents, resolved complex defects, and automated deployments using Puppet scripts.

Compliance Auditing Feature (API Framework)

Developer

Tech Stack: C#, .NET Core 5 / 6 / 8, Angular, Elasticsearch (7.x / 8.x), WIX Toolset 3.11, SQLite, T-SQL | **Env:** Visual Studio 17, Git, Bitbucket, JIRA, TFS

Description: Audit logging framework capturing database changes and providing high-speed search retrieval.

- Conducted POCs to select optimal technology; designed log capture services tracking T-SQL database changes and streaming to **Elasticsearch (7.x / 8.x)**.
- Implemented index management and search query optimizations, integrated **SQLite** for local data caching, and authored **WIX Toolset 3.11** deployment packages.

Compliance Accelerator

Developer

Tech Stack: C#, WPF, T-SQL, Angular, JavaScript, ASP.NET Core REST APIs | **Env:** Visual Studio 17, Git, Bitbucket, JIRA, TFS

Description: Compliance monitoring solution across diverse content sources (Exchange, SMTP, Bloomberg, Teams Chat) under data governance laws.

- Investigated and resolved critical defects in enterprise WPF desktop applications to maintain data governance standards.
- Developed responsive Angular UI screens and integrated underlying ASP.NET Core REST APIs.

Persistent Systems Limited

Sept 2015 – Feb 2020 | Pune, India

Module Lead

Client: Agilent Technologies — Life Sciences & Hardware Instrumentation

Smart Alerts (Web Application)

Developer / Lead

Tech Stack: C#, REST APIs, Web API, MongoDB, jQuery, JavaScript, AWS Services, WIX Toolset | **Env:** Visual Studio 17, Git, Bitbucket, JIRA

Description: Real-time laboratory instrument monitoring application sending threshold alerts for part upgrades and maintenance.

- Architected a multi-threaded web application monitoring hardware telemetry and part usage thresholds to trigger email and dashboard alerts.
- Proposed technical solutions for new features, resolved defects, and conducted customer communications and live product demos.

ACE – Agilent Compliance Engine (Desktop Application)

Developer

Tech Stack: C#, WPF, MVVM, REST APIs, Sci-Chart | **Env:** IBM ClearCase, Visual Studio 15

Description: Enterprise WPF application for pharmaceutical drug analysis device testing and compliance report generation.

- Developed a WPF desktop application executing automated test suites on pharmaceutical hardware devices to verify operational integrity.
- Conducted log, security, and performance investigations and integrated real-time sensor telemetry visualization using **Sci-Chart**.

DDK – Domain Development Kit

Developer / Lead

Tech Stack: C#, WPF, MVVM, Prism | **Env:** IBM ClearCase, Visual Studio 15

Description: XML configuration management tool replacing legacy Excel-based workflows for ACE compliance files.

- Built an XML management and validation tool with business validation rules to maintain ACE configuration files and eliminate invalid data entry.
- Led requirement gathering, technical architecture design, customer communications, and live product demos.

Training Calendar Tool

Developer

Tech Stack: C#, MySQL, jQuery, HTML, Web API

Description: Single-page enterprise training management web application with scheduling conflict resolution.

- Designed a layered single-page web app for enterprise training event tracking, resolving trainer schedule overlaps and handling asynchronous AJAX updates.

EDUCATION

Bachelor of Engineering (B.E.) — MIT Aurangabad

2015

Diploma in Information Technology — CSMSS Aurangabad

2012
